...er the new bed net is 10 per cent less likely to be as effective as a conventional

mosquitoes) are increasingly becoming resistant to the most common insecticides, called pyrethroids, used to treat traditional bed nets.

...bites than conventional bed nets treated only with a pyrethroid. As it is less likely that mosquitoes become resistant to both chemicals in the combi-

...an insect growth hormone, which was significantly more protective than the old net type," said Lindsay.

Island society was more sophisticated than thought

Aug 13 (PTI): ...nd may have had a more highly sophisticated society than the people shared and collaborated, a study. The island 3,700 kilometers off the coast of Chile is a place with the "big stone heads." It has been a place where seafarers set up giant statues, and had their own socie-

ty through in-fighting and over-exploitation of natural re-

sources. "For a long time, people wondered about the culture behind these very important statues," said Laure Dussubieux, a scientist at Field Museum in the US. "This study shows how people were interacting, it's helping to revise the theory," Dussubieux said. The study, published in the Journal of Pacific Archaeology, analysed the chemical makeup of the tools used to create the big stone sculptures, hinting at a more complex story.
